**Anywhere VIII** Sean Lowry 2019-11-30 Artists and curators have long reached beyond the constraints of established institutional structures and traditional exhibition spaces. These tendencies were first clearly articulated (with some notable historical avant-garde precedents) in the language that framed conceptual and systems-based art in the 1960s and 1970s. The focus then, as it is today, was upon locating or creating alternative circuits. Today, notwithstanding our significantly technologically augmented capacity to reach and create new audiences, much contemporary artistic activity still invariably plays directly to an audience of connected peers. Moreover, given that much of this activity is now documented and disseminated as it happens through its surrounding peer network, the robustness of documentation and critical discussion can become easily distorted. Consequently, an inherent correlation to social acceptance and favorability can limit our capacity to meaningfully evaluate quality, and often excludes contributions outside a core group. Also, given that much art now shares media with other databases and websites, algorithmically driven perceptions of popularity can further influence ways in which art is evaluated, interpreted and valued. This situation invariably presents challenges to artists and curators seeking to establish new audiences or disseminate ideas. Today, new artistic and curatorial approaches are emerging in tandem with digitally-activated modes of presentation and dissemination distinguished by perpetual reproducibility, multiple intersecting temporalities and materializations, and the

subsidence of physical space. Significantly, many of these approaches are no longer necessarily connected to singular events or spaces and are perhaps better understood as omnidirectional movements between modes of conception, production and dissemination connected through the screen as a communal space. This communal space might offer either access to new works, illuminate the existence of works understood to be elsewhere in time and space, or offer multiple or alternative materializations, versions, attributions, interpretations and representations of existing works. Artistic research can be represented in multiple ways as it moves between modes of conception, production and dissemination. This volume explores a broad range of questions associated with presenting, experiencing, discussing and evaluating art located anywhere and elsewhere in space and time. We are delighted to welcome you to the many worlds contained within.

Casino Chronicle Pascale Batieufaye 2021-01-11  
Casino Chronicle is the story of how one man contributed a number of visionary ideas that the casino he worked for used to grow its business and add comforts to its customers. This should be a story about great success for the writer and his employer, but unfortunately it is not. This memoir is also the chronicle of how the author's ideas were stolen, under the guise of an "employee suggestion program," then he was marginalized, his sanity questioned, and then ultimately pushed aside. It revolves around a series of dark chapters from 1996 to 2004 that would change the author's life, but also teach valuable lessons about the nature of casinos and

the truth about what can go wrong between the powerful and the powerless. This is one man's story, but it could happen to anybody.
