This book shares stories of pioneering educators, students, and activists engaged in issues related to food, water, oil, and coal in communities from the mountains of Appalachia to a small village in the Arctic; the deserts of New Mexico to the coast of New Orleans; and the streets of Oakland, California to the hills of South Carolina. Ecoliterate marks a rich collaboration between Daniel Goleman and the Center for Ecoliteracy, an organization best known for its pioneering work with school gardens, school lunches, and integrating ecological principles and sustainability into school curricula. For nearly twenty years the Center has worked with schools and organizations in more than 400 communities across the United States and numerous other countries. Ecoliterate also presents five core practices of emotionally and socially engaged ecoliteracy and a professional development guide. *How to Get People to Do Stuff* Susan Weinschenk 2013-03-07 We all want people to do stuff. Whether you want your customers to buy from you, vendors to give you a good deal, your employees to take more initiative, or your spouse to make dinner—a large amount of everyday is about getting the people around you to do stuff. Instead of using your usual tactics that sometimes work and sometimes don't, what if you could harness the power of psychology and brain science to motivate people to do the stuff you want them to do - even getting people to want to do the stuff you want them to do. In this book you'll learn the 7 drives that motivate people: The Desire For Mastery, The Need To Belong, The Power of Stories, Carrots and Sticks, Instincts, Habits, and Tricks Of The Mind. For each of the 7 drives behavioral psychologist Dr. Susan Weinschenk describes the research behind each drive, and then offers specific strategies to use. Here's just a few things you will learn: The more choices people have the more regret they feel about the choice they

pick. If you want people to feel less regret then offer them fewer choices. If you are going to use a reward, give the reward continuously at first, and then switch to giving a reward only sometimes. If you want people to act independently, then make a reference to money, BUT if you want people to work with others or help others, then make sure you DON'T refer to money. If you want people to remember something, make sure it is at the beginning or end of your book, presentation, or meeting. Things in the middle are more easily forgotten. If you are using feedback to increase the desire for mastery keep the feedback objective, and don't include praise.

**Measuring the Immeasurable** Daniel Goleman 2008 Collects essays on meditation, the power of prayer, optimism, thankfulness, neurophenomenology, and alpha brain waves, all written from the perspective that science and spirituality should not be in opposition. *Primal Leadership* Daniel Goleman 2013 Annotation.

*Focus* Daniel Goleman 2013-10-08 In Focus, Psychologist and journalist Daniel Goleman, author of the #1 international bestseller Emotional Intelligence, offers a groundbreaking look at today's scarcest resource and the secret to high performance and fulfillment: attention. Combining cutting-edge research with practical findings, Focus delves into the science of attention in all its varieties, presenting a long overdue discussion of this little-noticed and under-rated mental asset. In an era of unstoppable distractions, Goleman persuasively argues that now more than ever we must learn to sharpen focus if we are to survive in a complex world. Goleman boils down attention research into a threesome: inner, other, and outer focus. Drawing on rich case studies from fields as diverse as competitive sports, education, the arts, and business, he shows why high-achievers need all three kinds of focus, and explains how those who rely on Smart Practices—mindfulness meditation, focused preparation and recovery, positive emotions and connections, and mental “prosthetics” that help them improve habits, add new skills, and sustain greatness—excel while others do not.

**Practical Theology** Richard R. Osmer 2008-07-02 Every church congregation encounters challenging situations, some the same the world over, and others specific to each church. Richard Osmer here seeks to teach congregational leaders -- including, but not limited to, clergy -- the requisite knowledge and skills to meet such situations with sensitivity and creativity. Osmer develops a framework for practical theological interpretation in congregations by focusing on four key questions: What is going on in a given context? Why is this going on? What ought to be going on? and How might the leader shape the context to better embody Christian witness and mission? The book is unique in its attention to interdisciplinary issues and the ways that theological reflection is grounded in the spirituality of leaders. Useful, accessible, and lively -- with lots of specific examples and case studies -- Osmer's Practical Theology effectively equips congregational leaders to guide their communities with theological integrity.

With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us.

**What Makes a Leader? (Harvard Business Review Classics)** Daniel Goleman 2017-06-06 When asked to define the ideal leader, many would emphasize traits such as intelligence, toughness, determination, and vision—the qualities traditionally associated with leadership. Often left off the list are softer, more personal qualities—but they are also essential. Although a certain degree of analytical and technical skill is a minimum requirement for success, studies indicate that emotional intelligence may be the key attribute that distinguishes outstanding performers from those who are merely adequate. Psychologist and author Daniel Goleman first brought the term "emotional intelligence" to a wide audience with his 1995 book of the same name, and Goleman first applied the concept to business with a 1998 classic Harvard Business Review article. In his research at nearly 200 large, global companies, Goleman found that truly effective leaders are distinguished by a high degree of emotional intelligence. Without it, a person can have first-class training, an incisive mind, and an endless supply of good ideas, but he or she still won't be a great leader. The chief components of emotional intelligence—self-awareness, self-regulation, motivation, empathy, and social skill—can sound unbusinesslike, but Goleman found direct ties between emotional intelligence and measurable business results. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

**The Emotionally Intelligent Leader** Daniel Goleman 2019-07-16 Become a Better Leader by Improving Your Emotional Intelligence Bestselling author DANIEL GOLEMAN first brought the concept of emotional intelligence (EI) to the forefront of business through his articles in Harvard Business Review, establishing EI as an indispensable trait for leaders. The Emotionally Intelligent Leader brings together three of Goleman's bestselling HBR articles. In "What Makes a Leader?" Goleman explores research that found that truly effective leaders are distinguished by high levels of self-awareness and sharp social skills. In "The Focused Leader," Goleman explains neuroscience research that proves that "being focused" is more than filtering out distractions while concentrating on one thing. In "Leadership That Gets Results," Goleman draws on research to outline six distinct leadership styles, each one springing from different components of emotional intelligence. Together, these three articles guide leaders to recognize the direct ties between EI and measurable business results.

*Change Leader* Michael Fullan 2011-08-16 We live in a challenging, complex, inter-connected and unpredictable world beset by a range of seemingly insoluble problems. But, says Michael Fullan—an internationally acclaimed authority on organizational change—we have an increasing understanding of how to tackle complex change. This involves developing a new kind of leader: one who recognizes what is needed to bring about deep and lasting changes in living systems at all levels. These leaders need a deep understanding of what motivates us as human beings and how we tap into and influence other people's self-motivation. In his previous best-selling books *The Six Secrets of Change*, *Leading in a Culture of Change*, and *Turnaround Leadership*, Michael Fullan examined the concepts and processes of change. In *Change Leader* he turns his focus to the core practices of leadership that are so vital for leading in today's complex world. He reveals seven core practices for today's leaders, all of which appear to be deceptively simple

but actually get to the essence of what differentiates a powerful leader from one who is merely competent: Practice Drives Theory Be Resolute Motivate the Masses Collaborate to Compete Learn Confidently Know Your Impact Sustain Simplicity Throughout the book Fullan argues that powerful leaders have built bedrocks of credibility, have learned how to identify the few things that matter most, and know how to leverage their skills in ways that benefit their entire organization. The author shows leaders how to avoid policies and strategies that focus on shallow and short-term goals and develop leadership skills for long-term success. With a wealth of illustrative examples from business, education, nonprofit, and government sectors Change Leader provides a much-needed leadership guide for today's turbulent climate.

**Destructive Emotions** Daniel Goleman 2008-11-19 \*Why do seemingly rational, intelligent people commit acts of cruelty and violence? \*What are the root causes of destructive behavior? \*How can we control the emotions that drive these impulses? \*Can we learn to live at peace with ourselves and others? Imagine sitting with the Dalai Lama in his private meeting room with a small group of world-class scientists and philosophers. The talk is lively and fascinating as these leading minds grapple with age-old questions of compelling contemporary urgency. Daniel Goleman, the internationally bestselling author of Emotional Intelligence, provides the illuminating commentary—and reports on the breakthrough research this historic gathering inspired. Destructive Emotions Buddhist philosophy tells us that all personal unhappiness and interpersonal conflict lie in the "three poisons": craving, anger, and delusion. It also provides antidotes of astonishing psychological sophistication—which are now being confirmed by modern neuroscience.

With new high-tech devices, scientists can peer inside the brain centers that calm the inner storms of rage and fear. They also can demonstrate that awareness-training strategies such as meditation strengthen emotional stability—and greatly enhance our positive moods. The distinguished panel members report these recent findings and debate an exhilarating range of other topics: What role do destructive emotions play in human evolution? Are they “hardwired” in our bodies? Are they universal, or does culture determine how we feel? How can we nurture the compassion that is also our birthright? We learn how practices that reduce negativity have also been shown to bolster the immune system. Here, too, is an enlightened proposal for a school-based program of social and emotional learning that can help our children increase self-awareness, manage their anger, and become more empathetic. Throughout, these provocative ideas are brought to life by the play of personalities, by the Dalai Lama’s probing questions, and by his surprising sense of humor. Although there are no easy answers, the dialogues, which are part of a series sponsored by the Mind and Life Institute, chart an ultimately hopeful course. They are sure to spark discussion among educators, religious and political leaders, parents—and all people who seek peace for themselves and the world. The Mind and Life Institute sponsors cross-cultural dialogues that bring together the Dalai Lama and other Buddhist scholars with Western scientists and philosophers. Mind and Life VIII, on which this book is based, took place in Dharamsala, India, in March 2000.

**Social Intelligence** Daniel Goleman 2006-09-26 Emotional Intelligence was an international phenomenon, appearing on the New York Times bestseller list for over a year and selling more than five million copies worldwide. Now, once again, Daniel Goleman has written a groundbreaking synthesis of the latest findings in biology and brain science, revealing that we are “wired to connect” and the surprisingly deep impact of our relationships on every aspect of our lives. Far more than we are consciously aware, our daily encounters with parents, spouses, bosses, and even strangers shape our brains and affect cells throughout our bodies—down to the level of our genes—for good or ill. In *Social Intelligence*, Daniel Goleman explores an emerging new science with startling implications for our interpersonal world. Its most fundamental discovery: we are designed for sociability, constantly engaged in a “neural ballet” that connects us brain to brain with those around us. Our reactions to others, and theirs to us, have a far-reaching biological impact, sending out cascades of hormones that regulate everything from our hearts to our immune systems, making good relationships act like vitamins—and bad relationships like poisons. We can “catch” other people’s emotions the way we catch a cold, and the consequences of isolation or relentless social stress can be life-shortening. Goleman explains the surprising accuracy of first impressions, the basis of charisma and emotional power, the complexity of sexual attraction, and how we detect lies. He describes the “dark side” of social intelligence, from narcissism to Machiavellianism and psychopathy. He also reveals our astonishing capacity for “mindsight,” as well as the tragedy of those, like autistic children, whose mindsight is impaired. Is there a way to raise our children to be happy? What is the basis of a nourishing marriage? How can business leaders and teachers inspire the best in those they lead and teach? How can groups divided by prejudice and hatred come to live together in peace? The answers to these questions may not be as elusive as we once thought. And Goleman delivers his most heartening news with powerful conviction: we humans have a built-in bias toward empathy, cooperation, and altruism—provided we develop the social intelligence to nurture these capacities in ourselves and others.

**Fourteenth Colony** Mike Bunn 2020-11-03 The British colony of West Florida—which once stretched from the mighty Mississippi to the shallow bays of the Apalachicola and portions of what are now the states of Florida, Alabama, Mississippi, and Louisiana—is the forgotten fourteenth colony of America's Revolutionary era. The colony's eventful years as a part of the British Empire form an important and compelling interlude in Gulf Coast history that has for too long been overlooked. For a host of reasons, including the fact that West Florida did not rebel against the British Government, the colony has long been dismissed as a loyal but inconsequential fringe outpost, if considered at all. But the colony's history showcases a tumultuous political scene featuring a halting attempt at instituting representative government; a host of bold and colorful characters; a compelling saga of struggle and perseverance in the pursuit of financial stability; and a dramatic series of battles on land and water which brought about the end of its days under the Union Jack.

In Fourteenth Colony, historian Mike Bunn offers the first comprehensive history of the colony, introducing readers to the Gulf Coast's remarkable British period and putting West Florida back in its rightful place on the map of Colonial America.

**The Tabernacle, Temple, and Sanctuary: The Book of Numbers** Dennis Herman 2016-02-05 This is the forth book in this series that began with an in-depth look at how God views details, communicates with this world, and decides what process to use. Of course this series of books looked at aspects recorded in scripture about the Tabernacle. How the materials were collected, specific design details, who did the work, and how the Tabernacle was constructed. Much of that information is found in dozens, maybe hundreds of other books about the Tabernacle. But there are details setting this book apart from every other book written about the Tabernacle. This book takes a verse by verse, story by story, chapter by chapter look at the Tabernacle. In other words, this book presents a picture of the Tabernacle from God's point of view. Which the beginning of this series pointed out, is much different than any human perspective.

**Focus** Daniel Goleman 2013-10-08 For more than two decades, psychologist and journalist Daniel Goleman has been scouting the leading edge of the human sciences for what's new, surprising, and important. Goleman shows why high-achievers need all three kinds of focus, as demonstrated by rich case studies from fields as diverse as competitive sports, education, the arts, and business. Those who excel rely on what Goleman calls Smart Practices such as mindfulness meditation, focused preparation and recovery, positive emotions and connections, and mental 'prosthetics' that help them improve habits, add new skills, and sustain excellence. **Emotional Equations** Chip Conley 2012-01-10 "An invaluable operating manual," says Tony Hsieh, Zappos CEO and author of *Delivering Happiness*. Using brilliantly simple logic that illuminates the universal truths in common emotional challenges, *Emotional Equations* offers a way to identify the elements in our lives that we can change, those we can't, and how to better understand our emotions so they can help us . . . rather than hurt us. Now Conley tells his own comeback story and those of other resilient people and inspiring role models who have worked through emotional equations in their own lives. *Emotional Equations* arms you with practical strategies

**Altered Traits** Daniel Goleman 2017-09-05 Two New York Times–bestselling authors unveil new research showing what meditation can really do for the brain. In the last twenty years, meditation and mindfulness have gone from being kind of cool to becoming an omnipresent Band-Aid for fixing everything from your weight to your relationship to your achievement level. Unveiling here the kind of cutting-edge research that has made them giants in their fields, Daniel Goleman and Richard Davidson show us the truth about what meditation can really do for us, as well as exactly how to get the most out of it. Sweeping away common misconceptions and neuromythology to open readers' eyes to the ways data has been distorted to sell mind-training methods, the authors demonstrate that beyond the pleasant states mental exercises can produce, the real payoffs are the lasting personality traits that can result. But short daily doses will not get us to the highest level of lasting positive change—even if we continue for years—without specific additions. More than sheer hours, we need smart practice, including crucial ingredients such as targeted feedback from a master teacher and a more spacious, less attached view of the self, all of which are missing in widespread versions of mind training. The authors also reveal the latest data from Davidson's own lab that point to a new methodology for developing a broader array of mind-training methods with larger implications for how we can derive the greatest benefits from the practice. Exciting, compelling, and grounded in new research, this is one of those rare books that has the power to change us at the deepest level.
